

5 CHALLENGES SOLVED BY OPENTICKET

A Digital Field Ticket Solution

1. UNNECESSARY DRIVING TIME

Time spent on the road tracking down company men to get paper tickets signed

Uses mobile and internet to minimize travel

2. PROCESS AUTOMATION

No easy way to reconcile scope, quantity, and price between field tickets and invoices

Automated compliance and reconciliation expedites approvals and payments

3. ANALYTICS

Field tickets contain a tremendous amount of valuable operational data, with no way to easily access it

All ticket information becomes analyzable data

4. AVAILABILITY

Operations personnel wait days or even weeks before finding out what was done at unmanned locations

Near real-time view of work performed provides complete visibility of all activities and costs across an entire region

5. OVERBILLING

Unintentional and intentional overbilling difficult to detect for high volume, low dollar services

Suspect transactions are easily identified through digital field ticketing
