

# Data Exchange

Managing oil & gas revenue data is essential to every business operation. Getting this right can save time and money, and increase operational efficiency.

## The Challenge

Managing large amounts of data, especially from multiple sources, can be tedious, time-consuming, and costly. Traditionally this data is provided in paper form containing hundreds of pages of information that's unstructured and inconsistent across providers, and can't be easily uploaded into your accounting system.

The process for distribution and consumption of data is cumbersome and involves significant manipulation. Due to the time-consuming and error-prone task of manually entering hundreds, if not thousands, of data points each month, more time must be spent reviewing for discrepancies and assuring quality data; all before any operational analysis can begin.

Add the growing complexity of analysis and reporting and you have a real and growing data management challenge.

## The Solution

With over 1.3 million owner/operator connections and the industry's largest inventory of electronic Oil and Gas revenue data, Data Exchange is a secure cloud-based service for royalty owners, working interest partners, and oil and gas asset managers to process data faster, with less cost and higher accuracy. Eliminate tedious and time consuming manual entry, and start increasing visibility into operations with automatic import of component level detail.

Whether you want all of your **Revenue Check Details, JIB Statements, Run Tickets & Statements, or Gas Plant Data** delivered real time in standard CDEX or on-demand in customized CSV, XLS, XML, GPX and CODE file formats –Data Exchange is your single source for high-quality, consistently structured electronic data.

With extensive file customization options, you now have one central location to receive all your revenue, check stub, or gas plant data in the ERP-ready file format to meet your reporting needs.

# Data Exchange Solutions

**Revenue Detail**

**Joint Interest Bill (JIB)**

**Run Ticket & Run Statement**

**Gas Plant Statement**

**Gas Balancing**

**Document Conversion Services**

Features	Benefits
Drive Efficiency and Accuracy	Cut processing time by +50 percent! Electronic data transfer reduces mistakes, delays, and reconciliation time and frees up staff for higher-value tasks.
Gain Visibility	Easy access to historical data streamlines trending and forecasting. Faster processing time means revenue and expense data are available into as little as three days for an accurate view of asset status.
Improve Client Relations	Timely payments and accurate statements drive higher levels of client satisfaction.
Enhanced Security	Data encryption during delivery and storage along with SSAE 16 SOC 1 Type II standard compliance protects sensitive financial data.
