

NEW Revenue Data Exchange

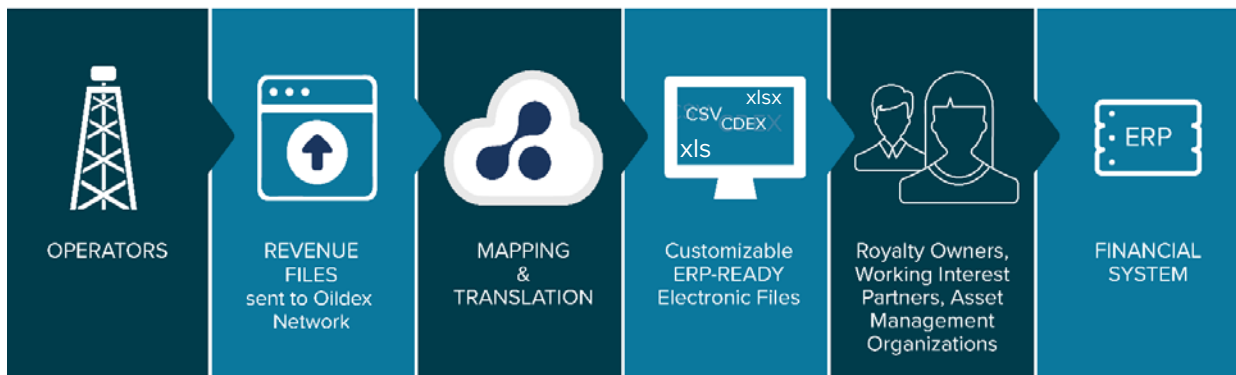

Managing oil & gas check stub data just got easier with Oildex’s new Revenue Data Exchange. Built on future-ready technology, with extensive file customization options, a sleek new look and friendly navigation, you now have one central location to receive all your check stub data in the ERP-ready file format you need to meet your reporting needs. With over 1.3 million owner/operator connections and the industry’s largest inventory of electronic check stub data, Oildex’s secure, cloud-based data exchange helps royalty owners, working interest partners and oil and gas asset managers to process data faster, with less cost and higher accuracy.

CHALLENGE: PAPER-HEAVY MANUAL PROCESSES

Managing check stub data can be tedious, time-consuming and costly. Check stubs can contain a dozen to hundreds of pages of information that’s often unstructured and inconsistent across payers. Add the growing complexity of revenue reporting and you have a real and growing data management challenge.

SOLUTION: OILDEX REVENUE DATA EXCHANGE

Whether you want all of your data delivered real time in standard CDEX or on-demand in customized CSV file formats – or a mix of both – Oildex is your single source for high-quality, consistently structured electronic check stub data.

BENEFITS

- Eliminate time and cost of manual, hand-key data entry
- Consistent, structured data to your specification
- Spend more time on high-value analytics and reporting tasks
- Improve accuracy and reduce delays and reconciliation time
- Reduce ERP file upload errors
- Book revenue faster
- Improve financial visibility
- One place to access all your current and historical data
- Quickly, easily and cost-effectively scale your business

ACHIEVE 100% ELECTRONIC PROCESSING

Receiving revenue from payers outside the Oildex network? Simply scan paper check stubs and upload them to our SFTP or check entry site. We'll convert them into formatted electronic files ready for upload into your accounting system.

FEATURES

CSV CUSTOMIZATION

Go beyond standard CDEX. Our easy-to-use, flexible and customizable CSV file formatting system gives you the data you need, in the format you need, for a 'right first time' upload.

ERP-Ready CDEX and Custom CSV File Formats

- Data maps: Property name, property number, product codes, interest types, taxes and deductions and decimal interest
- Custom fields: Define your own column names and values
- Owner & calculated fields not available in standard CDEX (i.e. owner severance tax, owner gross value)
- Delimiter options: Comma, tab, pipe, double pipe
- File extension options: .csv, .xls, .xlsx
- Custom date formats
- Primary and secondary format options

Flexible Receive Configuration

- Download format: CDEX, .csv, .xls, .xlsx
- Delivery schedule: On-demand, real time, scheduled
- Delivery method: Web download, email, secure FTP (push or pull)

Comprehensive Search

- Check Stubs: Search by sender name, check #, owner #, check amount, or date range
- Check Stub Detail: Search by property # on a check

Split Lines

- Split lines before download (on-demand customers)

Check Stub Display

- 90-day display of checks received (default)
- Display/view checks waiting for download
- Display/view checks previously downloaded

Check Stub Detail

- CDEX View: Lines displayed in CDEX format
- Check Stub View: Lines grouped by property

Flexible Document Download

- Check Stub
- Check Stub Property (with an option to exclude check stub property records from your CDEX or CSV files)

In-application Print

- Standard PDF print

Security

- SSAE 16 SOC 1 Type II Standard compliance
- Secure data encryption during transport and storage

User Friendly

- Mobile-friendly: Android devices, Apple iPad Mini and Pro, iPhone5 and above

Supported Browsers

- Internet Explorer 10 or 11, Firefox, Chrome and Safari

GO WITH THE LEADER

Oildex was founded by oil & gas professionals who understand the specific needs of its stakeholders. We have the largest network in the industry, with hundreds of operators and millions of owners, partners, banks, trusts, and wealth and royalty fund management customers who use our full range of data exchange services.

FUTURE-READY TECHNOLOGY

Our applications are built with best-of-breed security on a flexible, scalable open architecture, so you know your data is protected and you'll always have the best possible user experience.

SEEING IS BELIEVING

We know we have the most powerful platform available, but there's nothing like seeing it for yourself. Call today to schedule a personalized demo and see the software in action.
