FIELDTICKET—OILFIELD SERVICES SUITE

You want to get paid faster and grow your business. Using paper field tickets gets in the way of these goals. Ticket loss, inaccuracies, human error, and approval delays are all caused by paper tickets and translate into payment delays and wasted time.

Get rid of paper to get paid faster and save time and money with digital field tickets.

About FieldTicket

Enverus' FieldTicket mobile app allows your field workers to create tickets, submit for approval, capture signatures on the device, and submit a copy of the ticket to your office without having to leave the site.

Our digital solution offers a convenient way to assign and manage your field workers' schedule by simplifying your ticket creation and dispatch over an easy-to-use platform.

FieldTicket seamlessly integrates with OpenInvoice and OpenTicket. Simply submit a ticket with FieldTicket and a ticket is automatically created in OpenTicket. When you are ready to submit an invoice to OpenInvoice for payment, FieldTicket converts the ticket to an invoice.

Benefits of using FieldTicket

Get Paid Faster
Reduce DSO by shortening processing time due to human error, lost tickets, and approval delays.

Grow your Business
Increase your operational efficiency by saving travel time, spending less time processing paper documents, easily tracking A/R, and running reports.

Increase Safety
Reduce your employees' exposure to traffic accidents by eliminating unnecessary travel.
